Village of Gnadenhutten  
Attn: Mike Heil  
PO Box 129  
Gnadenhutten, OH 44629

Dear Mr. Heil:

On January 28, 2010, I conducted a sanitary survey of the Village of Gnadenhutten's public water system. You were interviewed and the water system was inspected in your presence.

The purpose of this evaluation is to determine the ability of the facility to provide adequate, safe and potable water that meets the requirements of the Ohio Administrative Code. The eight major elements that are generally reviewed during a sanitary survey include: source, treatment, distribution system, finished water storage, pumps/pump facilities and controls, monitoring/reporting/data verification, water system management/operation and operator compliance with State requirements. General supervision of the operation and maintenance of public water systems is a function of this Agency as set forth in Chapter 6109 of the Ohio Revised Code.

Identified below are regulatory requirements for which action must be taken to return to compliance, and recommendations to address deficiencies that have the potential to cause future violations or contamination. Each of the following sections is the results of findings documented in the Sanitary Survey Evaluation Report, a copy of which is being sent to your operator. We may also be sending your operator additional information (e.g. photographs, sampling results, violation report, etc.) to aid your water system in implementing the necessary corrective actions.

**REQUIREMENTS**

No required items were noted as being deficient. No response is required.
